CONTENT

1. Introduction 11
2. Geophysical methods in archaeology 12
2.1. Magnetometry 14
2.1.1. Sources of Magnetic Survey Anomalies 14
2.1.2. Magnetic survey in archaeology 16
2.1.3. Instrumentation 16
2.1.4. Magnetic survey workflow 19
2.2. Geoelectric Resistivity Methods 22
2.3. Georadar survey 24
2.4. Electromagnetic Induction (EMI) 28
2.5. Gravimetry 28
2.6. Seismics 30
3. Interpretation of geophysical data 32
3.1. Development of visualisation techniques 32
3.2. Definition of interpretation 32
3.3. Basic elements of data interpretation 34
3.4. Process of Interpretation 35
4. Archaeological features in geophysical data 40
4.1. Settlement features 40
4.1.1. Above-ground post-built structures 40
4.1.2. Sunken huts 42
4.1.3. Other settlement features 46
4.2. Graves and features connected to burial activities 50
4.2.1. Flat-grave cemeteries 50
4.2.2. Barrow cemeteries 55
4.3. Fortifications 60
5. Application of magnetic survey on extensive development-led projects – case studies 68
5.1. Bernolákovo, Obora site (Senec district, Slovakia) 68
5.2. Blatné, Hriadky site (Senec district, Slovakia) 74
5.3. Bratislava - Devínska Nová Ves, Múrnice site (Bratislava IV district, Slovakia) 85
5.4. D1 motorway bypass, Přerov – Předmostí (Přerov district, Czech Republic) 91
5.5. D11-06 motorway (sectors 06–08) (Hradec Králové district, Czech Republic) 100
5.6. Jelka, Zákruty site (Galanta district, Slovakia) 113
5.7. Road I/16 Slaný - Velvary (Kladno district, Czech Republic) 117
5.8. Tôň, Chmeľnisko site (Komárno district, Slovakia) 129
6. Evaluation of magnetic survey 136
6.1. Methods used for evaluating magnetic survey effectiveness 137
6.1.1. Manual visual comparison 138
6.1.2. Statistical spatial correlation 138

6.2. Results of the analysis 139
6.2.1. Bernolákovo, Obora site (Hall A) (Senec district, Slovakia) 139
6.2.2. Blatné, Hriadky site (Senec district, Slovakia) 142
6.2.3. D1 motorway bypass, Přerov – Předmostí (Přerov district, Czech Republic) 145
6.2.4. D11-06 motorway (sectors 06–08) (Hradec Králové district, Czech Republic) 146
6.2.5. Road I/16, Slaný - Velvary (Kladno district, Czech Republic) 150
7. Special topics 162
7.1. Optimising excavations through geophysics and geoarchaeological sampling: Research design and case studies 162
7.2. Evolution of Landscape in Moravia: Insights from Pollen Analysis 181
7.3. Magnetometry and the influence of recent disturbance sources on prospection results 189
8. Map of magnetic survey's potential in archaeology 199
9. Conclusion 207
10. References 208
