## **ANALYSIS OF THE NATURAL GAS SECTOR IN THE DANUBE REGION. . . . . 6**

### **Introduction. . . . . 6**

### **The Danube Region: Current Environment and Issues. . . . . 8**

**1) Lack of (political) will to cooperate, diverging interests  
and country-specific stumbling blocks . . . . . 9**

**2) Lagging harmonization of pertinent legislation . . . . . 14**

**3) Ineffective or entirely missing sectoral policies . . . . . 16**

**4) Instability, corruption and politicization  
as additional obstacles to development . . . . . 18**

a) Supply deals are often influenced by corruption & non-transparency . . 18

b) Coupling infrastructural projects with politics . . . . . 19

**5) Insufficient infrastructure . . . . . 21**

**6) Vicious circle of low natural gas utilization and sector development. . 24**

**7) Lack of indigenous resources . . . . . 26**

**8) Lack of reliable information sources . . . . . 30**

### **Recommendations. . . . . 30**

**1) Implement and enforce the IEM rules. . . . . 30**

**2) Increase and maintain transparency within the sector . . . . . 32**

**3) Invest in domestic infrastructure;  
aggregate demand within larger clusters. . . . . 32**

**4) Increase interconnectivity to take advantage of gas supplies  
of varied origin and transport it in various directions  
(source & route diversification). . . . . 33**

**5) Implement stable, predictable sectoral policies. . . . . 33**

**6) Improve the exchange of information and data. . . . . 34**
